

Personal information**Prenome/ Name** Marian Munteanu**E-mail** munteanu.marian@igr.ro, marianmunteanu2000@gmail.com**Nationality** Romanian**Studies** 1980 –1985 University “Al. I. Cuza” Iași Geology Engineer
1998, University “Al. I. Cuza” Iași, Ph.D. in Geology, specialization metallogeny**Work experience****Period** **March 2010 – present**

Name and address of employer Geological Institute of Romania, 1 Caransebeș St., sector 1, Bucharest.

Position Senior Scientific Researcher

Type of business Scientific research (Geology)

Main activities and responsibilities Research on the geological and structural conditions of mineral deposits, genesis of the mineralization, alteration, metamorphism, mobilization, lithologic and structural controls on metallogenesis. Participation to the harmonization of the geological data from Romania with the data from other EU countries under the INSPIRE Directive.

Projects:

- SUSMIN Instruments for gold sustainable mining (2014-2016). Project funded in the ERA MIN – ERA NET program.

- Maxi - Mineral Analysis using X-ray imaging (2014-2015). Project funded in the ERA MIN – ERA NET program.

- Minerals 4EU – Minerals Intelligence Network for Europe; project implemented by EuroGEOsurveys.

- Minventory – Statistical Information on EU Raw Materials Deposits; project funded by the European Commission through DG Enterprise.

- EuroGeoSource “EU Information and Policy Support System for Sustainable Supply of Europe with Energy and Mineral Resources” (2010-2013) in the frame of the CIP-ICT Program (Participant).

- "Investigation the rare elements in porphyry copper deposits from Romania" (2011-2013), funded by the Ministry of Education, Research, Youth and Sport (Mentor).

- Evaluation of the PGE potential of the mafic-ultramafic intrusions in Romania using the experience from the investigation of Panxi area, South-West China (Project Director, 2011-2012).

- SARMa - Sustainable Aggregates Resource Management (2010-2011), project within the Program "South-East Europe Transnational Cooperation" of the European Union (Participant).

Period **August 2008-August 2009**

Name and address of employer Anglo Platinum, Johannesburg, South Africa

Position Project Geologist

Type of business Geological exploration

Main activities and responsibilities Exploration for PGE, Ni and Cu in Panxi zone, Sichuan Province of China.

Activities: Geological mapping and correlation using ArcGIS software and data from outcrops, underground mining and drill cores; use of geochemical data to model ore distribution and genesis.**Period** **March 2004-August 2008**

Name and address of employer University of the Witwatersrand, 1 Jan Smuts St, Johannesburg, South Africa.

Position Research Fellow

Type of business Scientific research (Geology)

Main activities and responsibilities	Study of the geological conditions of the PGE and Ni-Cu mineralizations from the Sichuan Province of China – project funded by Anglo Platinum and by a THRIP grant from the South African Government, under the auspices of the National Research Foundation (NRF) of South Africa. <i>Activities:</i> Geological mapping; drill core logging; microscope study; geological mapping using ArcGIS software; sampling for geochemical, petrographic, and geochronological investigations; sample processing for geochemical investigations by XRF, ICP-MS, electron microprobe and SHRIMP; microscope study (polished and thin sections); use of geochemical data to elaborate petrogenetic and metallogenetic models; publication of results in scientific articles.
Period	November 1999-March 2004
Name and address of employer	National Agency for Mineral Resources, 36-38 Mendeleev St., sector 1, Bucharest
Position	Counselor IA
Type of business	Public servant, Geology Expert.
Main activities and responsibilities	Supervision and monitoring of programs for geological exploration and mining; elaboration of exploration and mining licenses, approvals for exploration, approvals for constructions in areas of hydrogeological protection
Period	November 1987-November 1999
Name and address of employer	Geological Institute of Romania, 1 Caransebeş St., sector 1, Bucharest
Position	Geology Engineer, Researcher, Senior Scientific Researcher
Type of business	Scientific research (Geology)
Main activities and responsibilities	Geological mapping, petrographic, mineralogical and metallogenetic studies, regional correlations. <i>Projects:</i> Study of the gold and base metal potential of the porphyry-type mineralization from the Talagiu Caldera (Apuseni Mts., Carpathians). Study of the metallogenetic potential of the Crystalline-Mesozoic Zone of the Eastern Carpathians (base metal, manganese, Pb-Zn in carbonate rocks). Petrographic and geochemical study of the Ditrău alkaline massif and of its thermal aureole, Eastern Carpathians, Romania. Petrologic, geochemical and metallogenetic (gold and base metals) study of the intrusive breccias in the Apuseni Mountains, Carpathians, Romania. Geological Map of Romania scale 1:50000, sheets Coşna, Cârlibaba and Gurahonţ (Carpathian Mts.).
Mother tongue	Romanian
Other languages	
English	Very good
French	Good
Computer skills and competences	ArcGIS, OCAD
Other skills and competences	Economist (1989-1994) , Faculty of Commerce, Academy of Economic Studies, Bucharest 2002-2004 – Environmental impact of mining. Post-graduate Certificate. Camborne School of Mines, Exeter University, UK
Research stages abroad	Feb-Apr 2013, Aug-Nov 2013, Nov 2013-Feb 2014, May-Aug 2014. Invited Research Fellow at Rhodes University, Grahamstown, South Africa.
Professional affiliations	Romanian Society of Economic Geology (vice-president), IAVCEI (member),
